PROFESSIONAL SUMMARY

Results-driven MERN Stack Developer with over 2 years of experience building scalable, high-performance web applications. Expert in designing full-stack solutions with a focus on clean architecture, reusable React components, and optimized Node.js backends. Proven track record in implementing real-time features using Socket.io and building secure RESTful APIs. Passionate about writing maintainable code and leveraging modern tools like TypeScript and Vite to deliver seamless user experiences.

TECHNICAL SKILLS

Frontend: React.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), TypeScript

Backend: Node.js, Express.js, RESTful APIs, Socket.io, JWT Authentication

Database: MongoDB, Mongoose, PostgreSQL (Basic), Database Design & Indexing

Tools & DevOps: Git, GitHub, Docker, Vite, Postman, AWS (EC2/S3), Heroku/Vercel

PROFESSIONAL EXPERIENCE

Full Stack Developer

June 2022 – Present

Nexus Tech Solutions

San Francisco, CA

- Lead development of a collaborative project management tool using the MERN stack, resulting in a 30% increase in user engagement.
- Architected and implemented secure RESTful APIs in Node.js, integrating third-party services like Stripe and AWS S3.
- Developed responsive, interactive UIs with React.js, utilizing Vite for faster build times and optimized development workflow.
- Implemented real-time notification and chat systems using Socket.io, improving team communication efficiency by 40%.
- Optimized MongoDB queries and implemented caching strategies, reducing database response time by 25%.

Junior Web Developer

Jan 2021 – May 2022

CloudStream Media

Remote

- Built and maintained modern web applications using React.js and Express.js, ensuring cross-browser compatibility and mobile responsiveness.
- Collaborated with design teams to translate UI/UX wireframes into functional, high-quality code.
- Authored clean, maintainable code following industry best practices and performed regular code reviews.
- Assisted in the migration of a legacy monolithic application to a modular microservices-based architecture.

KEY PROJECTS

Real-Time Collaboration Suite

React, Node.js, MongoDB, Socket.io, Tailwind CSS

- Developed a multi-user document editor with real-time cursor tracking and instant updates.
- Engineered a robust backend to handle concurrent WebSocket connections and data persistence.

E-Commerce Platform Engine

MERN Stack, Redux, JWT, Stripe API, TypeScript

- Created a full-featured e-commerce engine with inventory management, secure checkout, and admin dashboard.
- Utilized TypeScript to ensure type safety and reduce production runtime errors.

EDUCATION

Bachelor of Science in Computer Science

State University of California

2017 – 2021

San Jose, CA
